5mm wall thickness is a full millimeter thicker for added strength.

Wall thickness reduced to 4mm at ends to accommodate the use of wrap-around style handguards.

Aircraft grade 7049 T-6 aluminum for greater durability.

7/8" outer diameter for use with standard mounts and hand controls.

Shot peened and anodized for better durability.

Knurled grip area to resist slippage.

Available in Red, Blue, Gold, Black and Silver.

Bar pad included.

X5 Mini Play handlebar #2025

Tapered outer wall 1 1/8" to 7/8" for use with standard size grips and hand controls.

Crossbar added for extra strength, and that "crossbar feel".

Cold forged from aircraft quality 7049 T-6 aluminum for greater durability.

Shot peened and anodized for better durability.

Knurled grip area to resist slippage.

Available in Black.

Black Bar Pad included.

privateer kit

T2 privateer kit

It's tough to be a privateer in honor of every struggling up & comer out there, TAG Metals continues to offer a low cost option for the discriminated privateer. The T2 privateer kit is made of a TAG Metals T2 upper clamp, a T2 handlebar, a bar pad and a set of soft/medium Custom grips.

Replacement Mounts for OEM clamps (A)

Designed to replace OEM rubber and solid mounts. Mounts are reversible allowing two different bar positions. Must use stock rubber cones.

#4098-S	FOR 7/8" BARS ON RM OEM 03'-07" RUBBER CLAMPS

Universal Mounting Kit (B)

Universal mounting kit allows fitment of T2 & other 1 1/8" diameter handlebars to OEM type clamps. Should not be used on rubber mounted triple clamps. Use Tigen mount (#4098). Precision machined from 7075-T6 billet aluminum.

#4098
TIGEN MOUNT: BUILT TO ORDER (SEE WEBSITE FOR DETAILS)

T2 triple clamp
Pre-pressed stem bearing and seal included at no extra charge on most models.

T2 upper clamp

CNC machined from a cold forged ingot of 7075 aluminum to provide rigidity. The T2 upper clamp is designed with a greater choice of riding positions in mind. With two mount holes to choose from, and our now classic reversible offset bar mounts, the T2 upper clamp offers an amazing forward set-up range of 22mm. When you keep in mind our +5mm & +10mm high optional bar mounts, you get a combination of 12 possible cockpit set-ups. No wonder TAG Metals triple clamps are becoming the hottest tool at the AMA Supercross. See page 14 for optional 7/8" bar mounts.

triple clamps

High quality pre-pressed seal & bearing

CNC-Machined triple clamp edges allow vibration dissipation.

Optional Rear bar mounts for T2 clamps

Optional Bar Mounts

Designed to fit TAG Metals T2 triple clamps only.

The Revolution Clamp

CNC-machined from cold-forged 7075 aluminum to provide maximum strength and rigidity. Tag Revolution clamp is lightweight to ensure better riding performance and bolts right onto your motorcycle. Easy to install with its pre-pressed stem seal and bearing, the Tag Revolution Clamp is designed for the ultimate riding performance. Tag's innovative design of its 7075-CNC rubber mounts and T-bar will significantly improve the riding experience while dampening vibrations and impacts. Bar mounts come in 1-1/8-inch ID and are Black anodized for a longer lasting finish.

Sprockets

Transmission of Knowledge

Developed especially for and tested by Team Factory Suzuki, Roger De Coster's tremendous knowledge and experience in the racing field were instrumental in helping us develop a complete range of racing sprockets. Adopted at its birth by Team Factory Suzuki and now used by Team Sabotage, Team Honda, Team Yamaha and Team Kawa.

Red Aluminum Sprockets

- CNC machined for precision and tight tolerances.
- Made of heat treated 7075-T6 aluminum.
- Red Hard anodized for abrasion and corrosion resistance.
- Self-cleaning mud grooves to prevent oil build-up.
- Lightweight computer aided design for increased performance.

The CUSTOM MX grip by TAG METALS

Cutting edge design includes a unique grip end that prevents premature tearing and a medium diameter to avoid arm pump. Two innovative synthetic rubber compounds provide the ultimate combination of tackiness, vibration damping even at low temperatures, no ripples and grid texture exposed for optimal comfort and control. Available in five attractive colors: Grey, Black, Blue, Red and Orange. 3 groove wing system allows secure fastening. Two compounds: soft/medium and medium/firm. ATV & Watercraft model for 1 1/2 inch handle.
Made in USA

- Innovative concept manufactured of a High-Density 6mm polyurethane
- Half the weight of Aluminum
- Does not rattle or vibrate
- Will not bend or dent
- More scratch resistant than Aluminum
- Intensely tested by top ATV Pros
- Race proven in 106 ATVA nationals and in the rocky California deserts
- Because of its polyurethane construction, the Railer provides a smooth feel and effortless glide over all terrains.

The ATV Steering Stem by Tag Metals

For the past few years, Tag Metals has been giving the professional and amateur racer the competitive edge with superior handlebars. Tag Metals now offers a high quality chrome steering stem for the Quad Racer at a price you can afford. Includes Steering Stem, Rubber bar mounts, and Bar pad.

Made from 4130 Chromoly tubing for Superior strength.

Triple plated chrome finish for improved wear and overall appearance.

Avail. in two bar clamp sizes 7/8" or 1.1/8". And in standard length or +1 to fit most of the sport quads.

Anti-Vibration bar mounts, which decreases the amount of vibrations felt through the handlebars.

CNC-Machined Rigid-guided mounting boss ensures perfect fitment.

5mm wall thickness is a full millimeter thicker for added strength.

Wall thickness reduced to 4mm at ends to accommodate the use of wrap-around style handguards.

Aircraft grade 7049 T-6 aluminum for greater durability.

7/8" outer diameter for use with standard mounts and hand controls.

Shot peened and anodized for better durability.

Knurled grip area to resist slippage.

Available in Red, Blue, Gold, Black and Silver.

Bar pad included.
